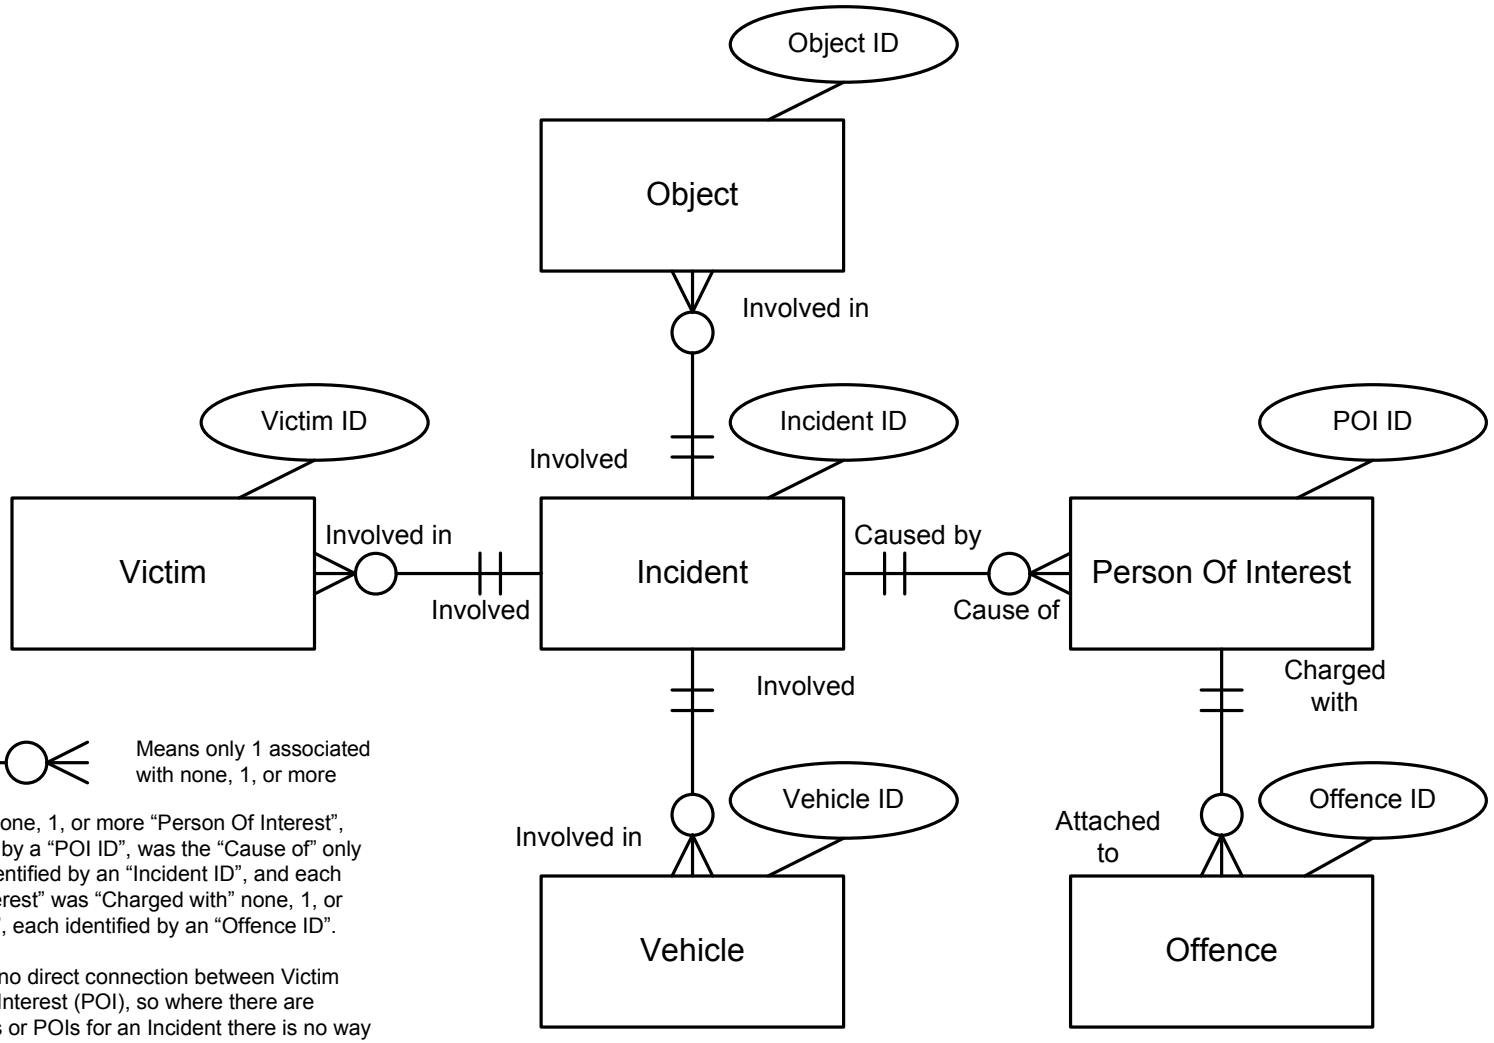
Recorded Crime Data Model and Crime Categories



Key

Means only 1 associated with none, 1, or more

For example, none, 1, or more “Person Of Interest”, each identified by a “POI ID”, was the “Cause of” only 1 “Incident”, identified by an “Incident ID”, and each “Person Of Interest” was “Charged with” none, 1, or more “Offence”, each identified by an “Offence ID”.

Note: There is no direct connection between Victim and Person of Interest (POI), so where there are multiple victims or POIs for an Incident there is no way to determine which POI is responsible for which victim.

Recorded Crime Data Model and Crime Categories

Object	
Incident Number	Object Sub-group
Object Group	
Drug Detection	Object Quantity
Drug Form	Object Status
Object Involvement	Object Value
Object Count	

Victim	
Incident Number	Victim CNI
